**DETAILED ACTION**

***Election/Restrictions***

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-55, drawn to a correction system, classified in class 342, subclass 357.03.
- II. Claims 56-60, drawn to locating a mobile device, classified in class 342, subclass 357.06.
- III. Claims 61-63, drawn to the use of a communication system, classified in class 342, subclass 357.1.

The inventions are distinct, each from the other because of the following reasons:

Inventions in Groups I, II, and III, are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions are: a correction system (Group I), locating a mobile device (Group II), and the use of a communication system (Group III).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for each Group is not required for the other Groups, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
